PROFILE

I am a third-semester software engineering student with a strong work ethic, a goal-oriented mindset, and the ability to collaborate effectively in a team environment. My belief in the value of hard work motivates me to continuously improve my skills and knowledge in the field.

I am a quick learner who is committed to continuously expanding my expertise. I have experience with Java, .Net, Web development, JavaScript, PostgreSQL, and Github and I am eager to take on new challenges to further develop my technical skills.

Moreover, my experience of living in Denmark since 2009 has given me an opportunity to learn Danish. My MSc. in international business has also provided me with a foundational understanding of business concepts and practices.

In light of my passion and dedication, I would be honored to contribute my skills, knowledge, and work ethic to your team. I am confident that I can bring a unique perspective and a commitment to excellence to any task assigned to me.

PROFESSIONAL EXPERIENCE

02/2023 – present
Horsens, Denmark

Student Instructor, VIA University College [📄](#)

I was chosen as a Student Instructor out of a pool of students to help Second Semester's students with Java coding and clarifying OOP concepts.

Key Responsibilities

- Help students with questions about Software Development in Java topics and guide them to understand and make exercises.
- Guidance regarding 2nd semester courses - Database System, Software Engineering, and Java.
- Prepare short presentations on topics related to exercises for the day.

12/2020 – 07/2021
Kolding, Denmark

Logistic Assistant, Lidl K/S

During my time as a logistics assistant at Lidl warehouse, I gained valuable experience in coordinating and managing the flow of goods. Overall, my experience as a logistics assistant has equipped me with strong organizational, communication, and problem-solving skills that I believe will be valuable in any logistics-related role.

EDUCATION

2022 – present Horsens, Denmark	Bachelor of Engineering in Software Technology , VIA University College ↗
2012 – 2014 Kolding, Denmark	MSc. in International Business , International Business Academy (affiliation to London South Bank University) ↗
2011 – 2012 Kolding, Denmark	Top - up Bachelor (Hons) in International Business , International Business Academy (affiliation to Coventry University)
2009 – 2011 Kolding, Denmark	AP Degree in Marketing Management , International Business Academy

MORE ON SKILLS

The skills mentioned above are not only my areas of experience, but also my focus for further development. I am working hard to achieve an expert level of proficiency in these technologies. Additionally, I am constantly exploring new skills and interests to expand my knowledge and stay current in the ever-changing tech industry. Although I have not listed them here, I am also actively learning and improving in other areas of technology. My passion for learning and growing as a professional makes me a valuable asset to any team.

PROJECTS

Semester 1 Project - Single User System

A single user system for room booking on a hotel was developed in the first semester using Java and JavaFX programming languages. The system allows users to search for available rooms, view details about the rooms, and make a reservation. Additionally, a website was created to showcase the hotel's features. The website was built using HTML, CSS, and JavaScript and provides a user-friendly interface to navigate through the hotel's offerings.

Semester 2 Project - Client-Server System

A client-server system for employer and jobseeker communication using Java, JavaFX, and RMI (Remote Method Invocation). The client-side of the system was built using JavaFX, which provided a modern, graphical user interface. The client connected to the server using RMI, which allowed for remote communication between the client and server. The server-side of the system was built using Java and RMI. The chat feature of the system was implemented using a separate chat window in the client interface.

Semester 3 Project - Distributed System

The proposed project involves the development of a complex distributed client-server web application utilizing cutting-edge technologies such as C#, Blazor, Java, Spring Boot, PostgreSQL, REST, and Sockets. The objective is to create a robust and scalable system that can handle large volumes of data and traffic. This project will require expertise in various programming languages and frameworks, as well as an understanding of software architecture and design patterns. The end result will be a highly functional and user-friendly web application that can effectively serve the needs of the intended audience.

Portfolio Website

I recently created a portfolio website to showcase my skills and projects. My website, which can be found at <https://pramesh-shrestha.github.io/> , is a proof that I keep on doing stuffs on free hours to increase my skills. Through my website and other projects, I have demonstrated my ability to work independently and as part of a team, my goal-oriented mindset, and my quick-learning abilities.

LANGUAGES

English		Danish	
Nepali		Hindi (India)	

HOBBY

Reading is one of my hobbies, and I particularly enjoy reading concise programming books that provide short and to-the-point explanations, tips, and tricks. I find it incredibly helpful to read these types of books as they provide me with useful information that I can apply in my projects. I also enjoy reading books that include mini-projects that I can try out and apply to my breadboard and Arduino. Overall, reading is a great way for me to expand my knowledge, stay up-to-date with the latest trends and developments, and enhance my skills in the programming field.

During my free time, I strive to expand my knowledge by exploring new subjects through YouTube tutorials. Specifically, I focus on programming languages I am familiar with, to delve deeper and gain a better understanding. Additionally, I enjoy spending time with my friends and indulging in video games as a means of relaxation.
